C68 Road

A high-end road bicycle designed to deliver the best riding experience
The C68 Road is an high-end road bicycle, designed to deliver the best riding quality. A modular structure is at the heart of the project, characterising this frame and the whole C-Series range. As all the C-series, it is entirely made in Italy by hand.

Una bicicletta da strada di alta gamma progettata per la migliore esperienza di guida
La C68 Road è una bicicletta da strada di alta gamma progettata per offrire la migliore qualità di guida. Al centro del progetto c'è la costruzione modulare, che caratterizza fortemente questo telaio e tutta la Serie C. Un altro aspetto che accomuna tutte le bici della Serie C è la produzione, che avviene a mano in Italia.

C68 Ti

The finest expression of multi-piece, Italian frame-construction art

The Colnago C68 Titanium represents the latest development in the company's efforts to create the absolute best handling and most comfortable bikes in the world. It relies on the traditional modular, multi-piece construction technique that has made Colnago renowned worldwide. The C68 Titanium is the option created especially for individuals who prefer a more custom geometry.

La più raffinata espressione dell'arte italiana della costruzione di telai modulare

La Colnago C68 Titanium rappresenta l'ultima innovazione tecnica in casa Colnago. Questo telaio è costruito secondo la tradizionale tecnica di costruzione modulare, quella che ha reso Colnago un marchio rinomato in tutto il mondo. La C68 Titanium è l'opzione creata appositamente per coloro che vogliono una geometria estremamente personalizzata, aliquip ex ea commodo consequat.

Performance, beauty and versatility: everything in one, unique bike
Handmade in Italy, the C68 Allroad uses the same construction method used for the C68 Road, with a more endurance-oriented geometry. This is a bike dedicated to people who love to ride all sorts of distances over all types of road surfaces, with the freedom to keep pedalling when the pavement ends.

Prestazioni, bellezza e versatilità: tutto in una sola bicicletta, unica
Realizzata a mano in Italia, la C68 Allroad utilizza lo stesso metodo di costruzione utilizzato per la C68 Road, con una geometria più orientata alle lunghe distanze. Questa è una bicicletta dedicata a chi ama percorrere distanze di ogni genere su qualsiasi tipo di superficie stradale, offrendo la libertà di continuare a pedalare anche quando l'asfalto finisce.

C68 Gravel

A gravel bike unlike any other

The C68 Gravel is the ultimate Colnago Gravel bike, a masterpiece that embodies the perfect fusion of Colnago technology and timeless Italian craftsmanship. It comes with a different geometry to the C68 Road, offering an optimal handling and riding position, perfectly poised for challenging landscapes, while maintaining an overall aggressive position. Keeping true to the Colnago spirit, it's a gravel bike designed for fast gravel.

Una bici da gravel unica, diversa da tutte le altre

La C68 Gravel è una bicicletta sofisticata, elegante, capace di interpretare ed esprimere al meglio il marchio Colnago, il miglior trade-off tra Bellezza e Performance. Presenta una geometria diversa rispetto al C68 Road, per garantire una maneggevolezza e una guidabilità perfettamente bilanciata per affrontare strade sterrate e largose, pur mantenendo un assetto complessivamente aggressivo. Come da spirito Colnago, è una bici pensata per il gravel veloce.

A product for people with a sophisticated cycling culture.

The Colnago Rim Brake is a product born out of passion and love for cycling. It is a frame that transcends time and trends. Because of its special and niche nature, very few people will be able to boast of owning one.

Master

Master

The pride of owning a timeless classic

First produced in the early 1980s, the steel Master frame is the classic par excellence in the history of great cycling. It has achieved unforgettable victories with legendary champions. The Master frame is still built entirely in Italy and is still made from the iconic Colnago DT15V steel tubes, with the characteristic star-shaped tube cross-section.

V4Rs

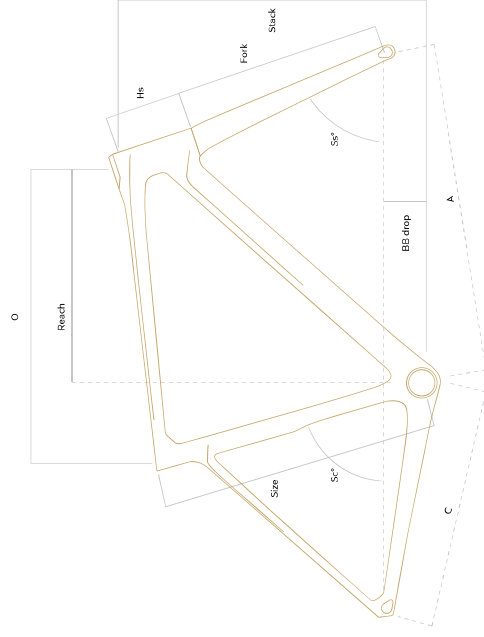

Built to Win

The Colnago V4Rs is the road racing bicycle created by Colnago in collaboration with UAE Team Emirates and UAE Team ADQ, designed to deliver top-level performance and excel in the WorldTour. It's the evolution of the already successful V3Rs, with improved stiffness, better aerodynamics and a weight decrease.

Costruita per Vincere

La Colnago V4Rs è la bicicletta da corsa realizzata da Colnago in collaborazione con UAE Team Emirates e UAE Team ADQ, progettata per dare performance di altissimo livello e vincere nel WorldTour. È l'evoluzione della già vincente V3Rs, ma ancora più rigida, più dinamica e più leggera.

Built to defy air

The Colnago Y1Rs is engineered to be the most aerodynamic bike in the World Tour, designed to excel in both Classics and Grand Tours.

By leveraging new UCI regulations, it achieves unparalleled performance against air resistance.

Revolutionary Aerodynamics

Frontal Area: A thinner headtube and innovative CC-Y1 handlebar reduce frontal drag by 15%, setting a new benchmark for aerodynamics.

Downtube Design: Using advanced CFD modeling and research with Politecnico di Milano, the downtube now features a mixed shape optimized to channel airflow and minimize drag.

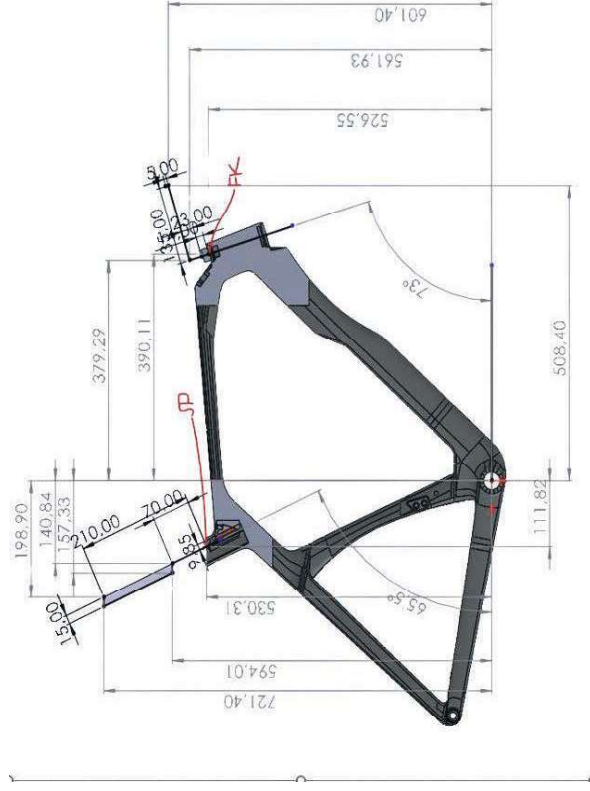

Innovative Components

Headset: Enhanced lateral surfaces improve airflow, with a reimagined fork and compact bearings for superior aerodynamics.

Seatpost Design: The double Y-shaped seatpost and seat tube ensure improved comfort and vertical compliance, ideal for long rides.

Efficiency at the Core

The Y1Rs incorporate a BSA bottom bracket for reduced weight and added stiffness, ensuring peak performance in every race.

STEELNOVO

A tribute to 70 years of Colnago craftsmanship, the Steelnovo Settanta blends Italian tradition with modern innovation.

This limited edition bike, featuring only 70 pieces, celebrates Colnago's founding in 1954 and comes equipped with a custom Campagnolo Super Record Wireless groupset, adorned with Italian flags to honor its heritage.

Timeless Design, Modern Technology

Steel Frame: Crafted using traditional Italian brazing techniques, with tubes developed in collaboration with Columbus for custom shaping and bending.
3D-Printed Joints: Advanced lugs and joints, designed with Additiva Lab, ensure robust connections, lightweight performance, and seamless tube integration.

Performance and Comfort

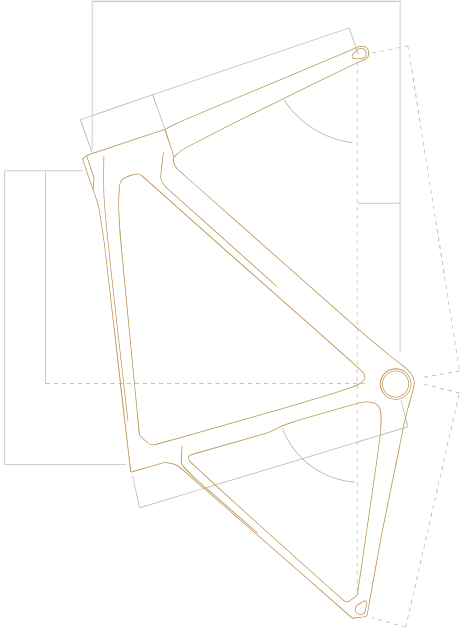

Racing Precision: Oversized headset and T47 bottom bracket deliver stiffness, quick handling, and smooth acceleration.

Tire Clearance: Supports up to 35mm tires, ideal for endurance rides or speed-focused setups.

Versatile Geometry: Optimized for both comfortable long-distance rides and aggressive racing positions.

Tradition Meets Innovation

The Steelnovo Settanta represents Colnago's rich history while embracing cutting-edge technology, making it the ultimate blend of heritage and performance.

V4

Lightness and responsiveness, with the charm of Colnago

The Colnago V4 is an all-round bicycle, a bike that is extremely fun to ride and has a clean and refined design. The frame is a monocoque which is stiff, solid, reactive, and which enjoys the same carbon layout R&D and aerodynamic studies that led to the realization of the V4Rs.

Leggerezza e reattività, con il fascino di Colnago

La Colnago V4 è una bicicletta a tutto tondo, estremamente divertente da guidare e dal design pulito e raffinato. Il telaio è un telaio monoscocca rigido, solido e reattivo, che gode della stessa ricerca e sviluppo sul layout del carbonio e degli stessi studi aerodinamici che hanno portato alla realizzazione dei V4Rs.

Scansiona il codice QR per le informazioni tecniche più aggiornate

A balanced gravel racing bike, to perform at its best in every context
The G4-X is the result of optimizing all those factors that are important when you have to compete or go hard on dirt roads: handling, lightness, downhill rideability, stability, frame responsiveness, and, like all Colnago bikes, surprisingly wonderful to ride.

Una bici da corsa gravel equilibrata, per dare il meglio di sé su ogni terreno
La G4-X è il risultato dell'ottimizzazione di tutti quei fattori che sono importanti quando si deve gareggiare o andare forte su strade sterrate: maneggevolezza, leggerezza, guidabilità in discesa, stabilità, reattività del telaio e, come tutte le bici Colnago, sorprendentemente meravigliosa da guidare.

TT1

Scan the QR code for the most updated technical info
Scansiona il codice QR per le informazioni tecniche più aggiornate

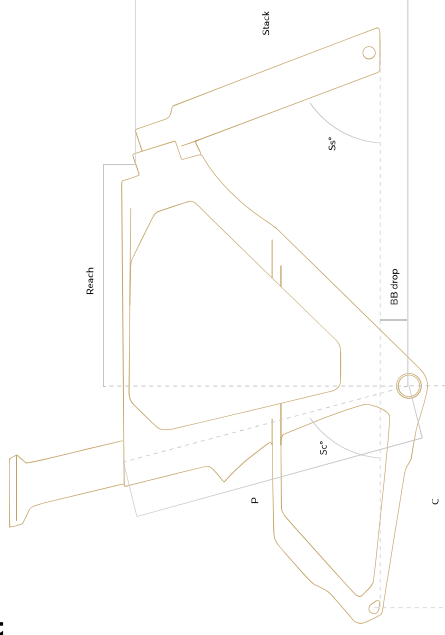

The fastest time trial frame in the WorldTour

The TT1 is the first Colnago time trial bike with a disc brake system. This choice ensures optimal routing of hydraulic tubes within the frame, providing improved braking performance and increased overall bike stiffness, thanks to the use of thru-axles on the wheels.

Il telaio da crono più veloce del WorldTour

La TT1 è la prima bicicletta da cronometro Colnago con sistema frenante a disco. La scelta garantisce il miglior instradamento dei tubi idraulici all'interno del telaio con migliori prestazioni di frenata e una maggiore rigidità dell'intera bicicletta grazie all'utilizzo di assi passanti sulle ruote.
