COLNAGO

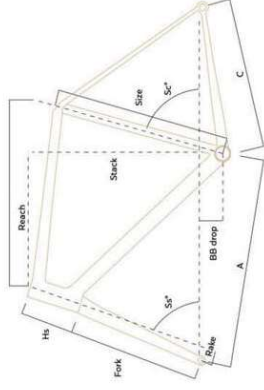

C72

The legend of the C series

This bike is 100% made in Italy. From tube design and manufacturing to frame assembly and painting, everything happens in Italy. Frame construction is carried out in Cambiogo, at Colnago HQ. After painting—done at Colnago's facilities in Pisa—the bike returns to Cambiogo for final assembly.

Compatibility

- Compatible only with the D-shape steering tube of C72

Performance

- Weight: approx. 10 g lighter than CC.01
- Improved stiffness.

Installation & integration

- Dedicated system to support precise handlebar alignment
- Traditional installation with lateral screws

Updated ergonomics (vs CC.01)

- Based on feedback on CC.01, the bend/shape has been revised to:
 - prevent some riders from hitting their wrist, against the bar while in the drops
 - deliver a more vertical, natural grip in the drops position

The handlebar geometry has been updated accordingly to improve comfort and control in the drops.

C68 Gravel

A gravel bike unlike any other

The C68 Gravel is the ultimate Colnago Gravel bike, a masterpiece that embodies the perfect fusion of Colnago technology and timeless Italian craftsmanship. It comes with a different geometry to the C68 Road, offering an optimal handling and riding position, perfectly poised for challenging landscapes, while maintaining an overall aggressive position. Keeping true to the Colnago spirit, it's a gravel bike designed for fast gravel.

Una bici da gravel unica, diversa da tutte le altre

La C68 Gravel è una bicicletta sofisticata, elegante, capace di interpretare ed esprimere al meglio il marchio Colnago, il miglior trade-off tra Bellezza e Performance. Presenta una geometria diversa rispetto al C68 Road, per garantire una maneggevolezza e una guidabilità perfettamente bilanciata per affrontare strade sterrate e largose, pur mantenendo un assetto complessivamente aggressivo. Come da spirito Colnago, è una bici pensata per il gravel veloce.

COLNAGO

Master

The pride of owning a timeless classic

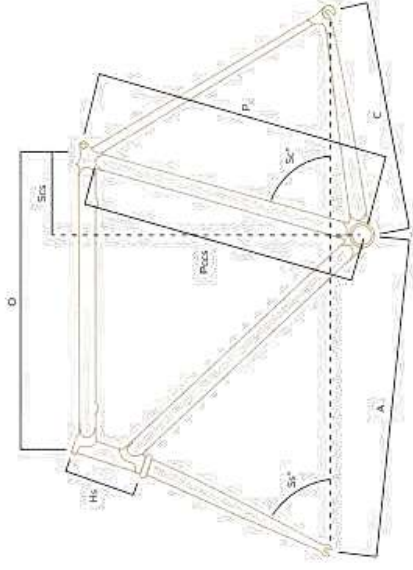

First produced in the early 1980s, the steel Master frame is the classic par excellence in the history of great cycling. It has achieved unforgettable victories with legendary champions. The Master frame is still built entirely in Italy and is still made from the iconic Colnago DT15V steel tubes, with the characteristic star-shaped tube cross-section.

A race bike built to win, refined for every detail.
The V5RS is 12.5% lighter, more aerodynamic, and just as stiff as the V4RS. Engineered for pro-level performance with optimized handling, sprint power, and all-day comfort—uphill, downhill, and everywhere in between.

Costruita per vincere. Perfezionata in ogni dettaglio. La V5RS è più leggera del 12,5%, più aerodinamica e altrettanto rigida rispetto alla V4RS. Progettata per prestazioni di livello professionale, con maneggevolezza ottimizzata, pazienza in valata e comfort per tutto il giorno—in salita, in discesa e ovunque nel mezzo.

V4Rs

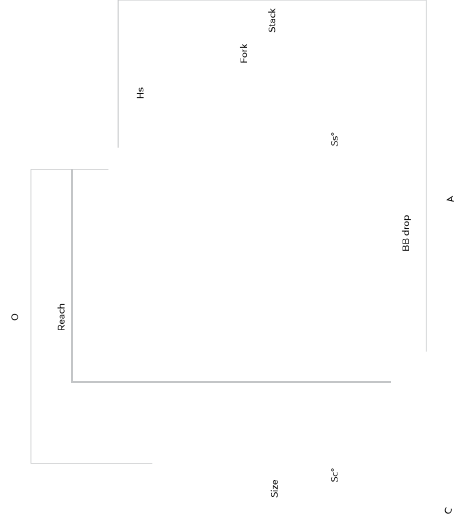

Built to Win

The Colnago V4Rs is the road racing bicycle created by Colnago in collaboration with UAE Team Emirates and UAE Team ADQ, designed to deliver top-level performance and excel in the WorldTour. It's the evolution of the already successful V3Rs, with improved stiffness, better aerodynamics and a weight decrease.

Costruita per Vincere

La Colnago V4Rs è la bicicletta da corsa realizzata da Colnago in collaborazione con UAE Team Emirates e UAE Team ADQ, progettata per dare performance di altissimo livello e vincere nel WorldTour. È l'evoluzione della già vincente V3Rs, ma ancora più rigida, più dinamica e più leggera.

Y1RS

Built to defy air

The Colnago Y1Rs is engineered to be the most aerodynamic bike in the World Tour, designed to excel in both Classics and Grand Tours.

By leveraging new UCI regulations, it achieves unparalleled performance against air resistance.

Revolutionary Aerodynamics

Frontal Area: A thinner headtube and innovative CC-Y1 handlebar reduce frontal drag by 15%, setting a new benchmark for aerodynamics.

Downtube Design: Using advanced CFD modeling and research with Politecnico di Milano, the downtube now features a mixed shape optimized to channel airflow and minimize drag.

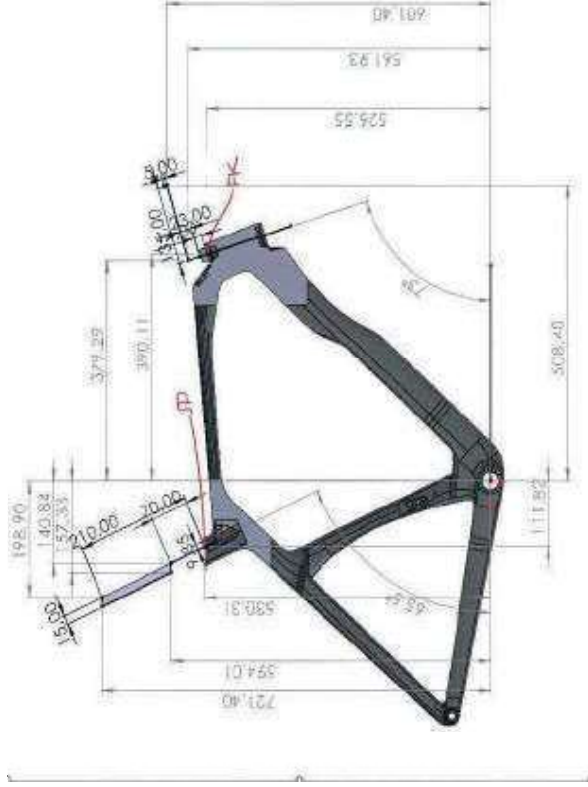

Innovative Components

Headset: Enhanced lateral surfaces improve airflow, with a reimagined fork and compact bearings for superior aerodynamics.

Seatpost Design: The double Y-shaped seatpost and seat tube ensure improved comfort and vertical compliance, ideal for long rides.

Efficiency at the Core

The Y1Rs incorporates a BSA bottom bracket for reduced weight and added stiffness, ensuring peak performance in every race.

A tribute to 70 years of Colnago craftsmanship, the Steelnovo Settanta blends Italian tradition with modern innovation.

This limited edition bike, featuring only 70 pieces, celebrates Colnago's founding in 1954 and comes equipped with a custom Campagnolo Super Record Wireless groupset, adorned with Italian flags to honor its heritage.

Timeless Design, Modern Technology

Steel Frame: Crafted using traditional Italian brazing techniques, with tubes developed in collaboration with Columbus for custom shaping and bending.

3D-Printed Joints: Advanced lugs and joints, designed with Additiva Lab, ensure robust connections, lightweight performance, and seamless tube integration.

Performance and Comfort

Racing Precision: Oversized headset and T47 bottom bracket deliver stiffness, quick handling, and smooth acceleration.

Tire Clearance: Supports up to 35mm tires, ideal for endurance rides or speed-focused setups.

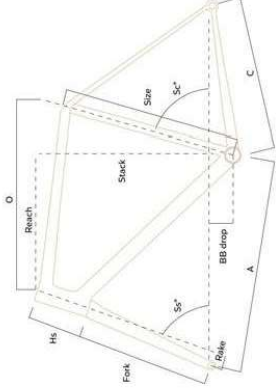

Versatile Geometry: Optimized for both comfortable long-distance rides and aggressive racing positions.

Tradition Meets Innovation

The Steelnovo Settanta represents Colnago's rich history while embracing cutting-edge technology, making it the ultimate blend of heritage and performance.

V4

Lightness and responsiveness, with the charm of Colnago

The Colnago V4 is an all-round bicycle, a bike that is extremely fun to ride and has a clean and refined design. The frame is a monocoque which is stiff, solid, reactive, and which enjoys the same carbon layup R&D and aerodynamic studies that led to the realization of the V4RS.

Leggerezza e reattività, con il fascino di Colnago

La Colnago V4 è una bicicletta a tutto tondo, estremamente divertente da guidare e dal design pulito e raffinato. Il telaio è un telaio monoscocca rigido, solido e reattivo, che gode della stessa ricerca e sviluppo sul layup del carbonio e degli stessi studi aerodinamici che hanno portato alla realizzazione dei V4RS.

G4-X

A balanced gravel racing bike, to perform at its best in every context

The G4-X is the result of optimizing all those factors that are important when you have to compete or go hard on dirt roads: handling, lightness, downhill rideability, stability, frame responsiveness, and, like all Colnago bikes, surprisingly wonderful to ride.

Una bici da corsa gravel equilibrata, per dare il meglio di sé su ogni terreno

La G4-X è il risultato dell'ottimizzazione di tutti quei fattori che sono importanti quando si deve gareggiare o andare forte su strade sterrate: maneggevolezza, leggerezza, guidabilità in discesa, stabilità, reattività del telaio e, come tutte le bici Colnago, sorprendentemente meravigliosa da guidare.
